DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4, 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, line 1 recites the limitation "the connector".

In claim 8, line 1 recites the limitation "the joint". There is insufficient antecedent basis for these limitations in the claim(s).

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1- 40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-22, 26-37 of U.S. Patent No. 6,356,442. Although the conflicting claims are not identical, they are not patentably distinct from each other because it has been held that omission of an element and its function (at least one electronic component embedded in the encasement portion so as to be external to the handheld computer when the spine is engaged with the accessory slot of the handheld computer in claim 1 or that a cable embedded in the encasement that connects the communication port on the encasement to the communication port in claim 28) in a combination where the remaining elements perform the same functions as before involves only routine skill in the art.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Netzel et al. (US Pat. 6,574,098) teach handheld computer casing with grooved feature formed on decorative surface.

Urban et al. (US 2001/0038525) teach encasement for handheld computer.
